

# Matter of Light

HIGGSFIELD GLOBAL FILM FESTIVAL · 5:00 · 21:9 · DEADLINE SEP 3, 11:59 PM PT

42 references   39 anchor frames   23 shots   34 run-sheet steps   5 gates   ~200 images: ~76 video

**How to use this kit.** Print it, clip it, keep a pencil on it. Squares are things to tick; ruled lines are yours to fill; anything already printed in *grey italic* is a suggestion read from the project as of Aug 27 — confirm or strike it, don't trust it. The app is the source of truth for prompts; these sheets are the source of truth for **what is actually done**. Tables are generated from the bible's own data, so counts here always match the app they were printed from.

## The last seven days

A compressed plan from today to the deadline. One line per day; write what actually happened beside it.

|        |                                                                                |                     |
|--------|--------------------------------------------------------------------------------|---------------------|
| Aug 27 | Finish Phase 0 — split the handles, remaining references, four lighting plates | <i>actual</i> _____ |
| Aug 28 | Gate A identity lock → anchor frames, Movements I and II                       | <i>actual</i> _____ |
| Aug 29 | Anchors Movement III → Gate B → stills reel → Gate C timing lock               | <i>actual</i> _____ |
| Aug 30 | Cheap motion pass, all 23 shots → Gate D motion lock                           | <i>actual</i> _____ |
| Aug 31 | Final generation — Movement I, start Movement II                               | <i>actual</i> _____ |
| Sep 1  | Final generation — finish Movement II, Movement III                            | <i>actual</i> _____ |
| Sep 2  | Deflicker → upscale → grade → Gate E picture lock → sound                      | <i>actual</i> _____ |
| Sep 3  | Watermark + packshot, public post, rights pass, verify project — SUBMIT        | <i>actual</i> _____ |

## The five gates

A gate is a hard stop — nothing downstream begins until it holds. Date each one the moment it locks.

|        |                                                     |                                |
|--------|-----------------------------------------------------|--------------------------------|
| Gate A | Identity lock — every face, palette and plate final | <input type="checkbox"/> _____ |
| Gate B | String lock — all 39 anchors on one contact sheet   | <input type="checkbox"/> _____ |
| Gate C | Timing lock — runtime, order and shot count freeze  | <input type="checkbox"/> _____ |
| Gate D | Motion lock — every seam confirmed at draft tier    | <input type="checkbox"/> _____ |
| Gate E | Picture lock — no further generation                | <input type="checkbox"/> _____ |

**Open decisions, still.** (The title is decided: *Matter of Light*, everywhere.) ① @Drowning — define or delete: \_\_\_\_\_ ② Leviathan scale reference object: \_\_\_\_\_

## How a film gets made here

The seventeen steps, in order. ♫ marks where a second pass is expected; ♫♫ where several are and the budget should say so. Grey rows are gates. Date each step when it is genuinely finished — not when it is started.

| STEP                                                                                                                                                                            | DONE                     | DATE  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-------|
| <b>01 Decide the film before you open anything</b><br>Fix the runtime, the shot count and how many identities appear on screen. Everything downstream derives from these three. | <input type="checkbox"/> | _____ |
| <b>02 Create the project</b><br>Make it inside the contest or workspace that will verify it, and generate everything there from then on.                                        | <input type="checkbox"/> | _____ |
| <b>03 Generate the governing rule sheet ♫</b><br>One image that fixes how your world's central visual idea works. It needs no identity and no location, so nothing blocks it.   | <input type="checkbox"/> | _____ |
| <b>04 Lighting plates, one per movement ♫</b><br>Empty frames, no characters. Key direction and palette only.                                                                   | <input type="checkbox"/> | _____ |
| <b>05 Train identity ♫♫</b><br>One trained Soul per character. Never two for one person.                                                                                        | <input type="checkbox"/> | _____ |
| <b>06 Build the world ♫</b><br>Locations, props, creatures, effects. Plain backgrounds, one asset per sheet.                                                                    | <input type="checkbox"/> | _____ |
| <b>07 GATE A – identity lock</b><br>Every reference side by side in one view. Look for a face that moved.                                                                       | <input type="checkbox"/> | _____ |
| <b>08 Anchor frames, in film order ♫♫</b><br>The first and last frame of every shot, generated as one continuous string rather than per scene.                                  | <input type="checkbox"/> | _____ |
| <b>09 GATE B – string lock</b><br>Every anchor on one contact sheet, in order. Read it as a comic strip.                                                                        | <input type="checkbox"/> | _____ |
| <b>10 Stills reel</b><br>Cut the anchors on a timeline at their real durations and watch the whole thing.                                                                       | <input type="checkbox"/> | _____ |
| <b>11 GATE C – timing lock</b><br>Durations are now fixed. Changing one after this point breaks the total runtime.                                                              | <input type="checkbox"/> | _____ |
| <b>12 Draft motion, cheap tier ♫</b><br>Every shot, lowest usable quality, no exceptions and no favourites.                                                                     | <input type="checkbox"/> | _____ |
| <b>13 GATE D – motion lock</b><br>Watch it end to end at draft quality. Every camera move and seam is decided here.                                                             | <input type="checkbox"/> | _____ |
| <b>14 Final shots ♫♫</b><br>Highest quality tier, one movement at a time, in film order.                                                                                        | <input type="checkbox"/> | _____ |
| <b>15 Finish</b><br>Deflicker first, then upscale, then grade. That order, always.                                                                                              | <input type="checkbox"/> | _____ |
| <b>16 GATE E – picture lock</b><br>No further picture changes. Audio is built against this cut and nothing else.                                                                | <input type="checkbox"/> | _____ |
| <b>17 Audio, then deliver ♫</b><br>Score, dialogue, sound design. Audio is usually exempt from from-scratch rules — check, then reuse freely if it is.                          | <input type="checkbox"/> | _____ |

# The run sheet

All 34 steps in production order — grey dates are the compressed targets; overwrite them in pencil with the real ones.

|    | PHASE   | STEP                                                                                                                                                                                                                                                                                                                            | DONE                                | DATE / TARGET |

## Phase 0 — the 42 references

Tick when the **A variant is selected, named and favoured** in the project — generated is not done. The short blank takes the winning take number. Generate the Rule sheet first: everything else grades against it. B / C / D variants are optional and wait until Gate A.

RULE SHEET · 1

☐ RULE-aura Aura grammar — core vs hollow

STATE LADDER · 2

☐ LADDER-oriane Oriane — the mind ladder

☐ LADDER-attunement The Turned — attunement ladder

CHARACTER · 11

☐ REF-oriane Oriane

☐ REF-oriane-damaged Oriane — battle damage

☐ REF-oriane-ascended Oriane — the ascended state

☐ REF-caedom-ascended Caedom — the ascended form

☐ REF-caedom-mortal Caedom — the mortal form

☐ REF-alder Alder — the elder brother

☐ REF-wren Wren — the younger brother

☐ REF-threadwright The Threadwright

☐ REF-keeper The Keepers

☐ REF-turned The Turned — sixteen pursuers

☐ LEV-rider The fused Dominion wielder

LESSER BEING · 7

☐ REF-bhollow Turned — Hollows

☐ REF-bwater Turned — Water and its Phases

☐ REF-benergy Turned — Energy

☐ REF-bgravity Turned — Gravity

☐ REF-bmetal Turned — Metals

☐ REF-bthrall Turned — Thrall

☐ REF-banchor Turned — Anchor

LIGHTING PLATE · 4

☐ PLATE-mv1-light Movement I — the Sun

☐ PLATE-mv2-light Movement II — the Ocean

☐ PLATE-mv3-light Movement III — the Island

☐ PLATE-mv3b Movement III — bombardment

BACKGROUND · 6

☐ BG-courtyard Courtyard of worlds

☐ BG-nacre Nacre Beach

☐ BG-bloom The Corals and the abyss

☐ BG-vigil-temple The white temple

☐ BG-keepers-isle Keeper's Isle — the ground

☐ BG-machira Machira from orbit

PROP · 7

☐ PROP-shell The aura and the light-formed pieces

☐ PROP-hollowstone The Founding Stone

☐ PROP-coral Leviathan coral plating

☐ LEV-body The Leviathan — whole creature

☐ PROP-ore Iron ore — the spears

☐ PROP-ships The twelve ships

☐ PROP-tear The frozen tear

Phase 1 — the 39 anchors, in film order

One row per image. S shared join (one image, two shots) · B bridge (the seam itself) · M matched pair across a transition · · single. Tick when selected and named; the blank takes the take number. Work strictly top to bottom so shared joins are generated once and inherited.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

39 images, not 46 — 7 slots are shared joins or bridges. Batch of 4 per anchor, select 1. Attach the movement's lighting plate and the relevant Soul on every generation. **F35 is the film** — biggest batch, longest look.

### Phases 3–4 — the 23 generations

Two boxes per shot: **draft** (cheap tier, Gate D) and **final**. A shot that fails three times leaves the queue for the escalation ladder — it does not get a quiet fourth try. Movement II must be generated in sequence: S7's end frame is S8's start frame.

**Finish order, always:** deflicker → upscale (aigc) → grade. S13 ships silent. S20 gets the most attempts of anything in the film. Two passes, then it ships.

Daily log — forty seconds before work

Four capture boxes: ① folder tree expanded ② Elements → Characters ③ Liked filter ④ generate bar. Then the three counts, elements, and one line for what is blocking. Full window, never a crop; one screen per image; never scale down.

| DAY    | CAPTURES                                                                                            | REFS          | ANCHORS       | SHOTS         | ELEMS | BLOCKED BY / NOTE |

Before you submit — the list that disqualifies

Every line here is a rule with teeth, not a style note. An entry missing an MVS component does not compete.

- ☐ Official watermark + packshot on the final video
- ☐ Public post (IG / YT / X / Reddit) — film with both intact
- ☐ Post AND account load in a logged-out window
- ☐ Every asset still inside the submission project — deleted nothing
- ☐ All prompts swept — no novel term anywhere
- ☐ Licence clause read: exclusive / assignment / underlying works / moral rights
- ☐ English subtitles or VO for all dialogue · MP4/MOV · ≤4K · 21:9
- ☐ End card: “Original screen story by B.L. Barkey”
- ☐ Submitted — with a day of margin, not at 11:58

Where everything lives: app + prompts → director-bible.html · one-pager → production-sheet.html · capture plate → design/four-captures.png · this kit rebuilds with design/build-sheets.py.
